(A periodic publication by Sherwood Oaks Executive Director, Annette McPeek)

**June 24, 2020**

## **Testing Results**

Sherwood Oaks conducted asymptomatic testing (no presence of illness) of health center residents and employees on campus this week. Of the 96 residents tested, all results were negative. We have learned through this testing that one of our non-clinical employees has tested positive for COVID-19.

This employee is in good health and not currently working on campus. Additional testing is required for this person prior to returning to work. We conducted contact tracing and no resident has been identified as being exposed.

This type of news can cause concern and anxiety. We will continue to follow our infection control and campus screening processes to ensure we maintain a healthy living and working environment. And, as always, you are welcome to contact me at ext. 8467 or [mcpeekaj@upmc.edu](mailto:mcpeekaj@upmc.edu) with any questions.

Thank you for your ongoing support.
